2018, the top problems Technovation students addressed by country were:
problems that the UN Sustainable Development Goals call on governments to address. In
workforce, including resilience, creativity, and technological literacy.

What do we equip students to solve the problems of tomorrow—when we don’t

An increasing number of regulations on AI will increase
education large companies will train non-technical employees to develop basic
products and affect more workplaces, we anticipate

As Artificial Intelligence continues to be built into more
10,732 people signed up to participate in our AI Family Challenge program

What lies ahead: 2019, Artificial Intelligence, and the Future of Work

We anticipate that these skills will continue to increase in demand as professional
development efforts focus on “soft skills” and lifelong learning initiatives in 2019 and

What Students Care About

Preparing for the Future: Twenty-first Century Skills

In 2018, we engaged over 4500 mentors in our programs:

Mentors gain skills and competencies

Getting Ready for the Future of Work

Professional Development for Mentors

We also found that students who

Participants plan to

And many students plan to
